Summary

Python Developer with **4+ years of experience** designing, developing, and deploying **scalable backend systems** and **data-driven applications**. Experienced in building **ETL pipelines**, **REST APIs**, and **microservices** using **Python, Django, and FastAPI**, with hands-on experience in **ML-based forecasting** for the telecom domain. Skilled in integrating **LLM APIs** using **RAG pipelines**, and deploying secure applications on **AWS** with **Docker** and **CI/CD**. Proven ability to deliver **scalable and intelligent backend systems** supporting **real-time analytics** and **automation**.

Experience

Python Developer - Accenture Sept 2022 – Present

- Designed and developed scalable backend systems using **Python, Django, and FastAPI**, building high-performance **RESTful APIs** for enterprise microservices architectures.
- Led development of an **AI-powered forecasting platform** for a US telecom client using **FastAPI, React.js, and BigQuery**, integrating machine learning prediction models.
- Built and deployed **cloud-native backend services on AWS**, ensuring scalable, reliable, and high-availability production systems.
- Developed **microservices architectures** integrating **MySQL and MongoDB**, improving backend scalability and data processing efficiency.
- Implemented **event-driven services using FastAPI and Kafka**, integrating enterprise workflows with **Salesforce** for real-time event streaming.
- Integrated **LLM APIs** into enterprise platforms with secure **JWT-based SSO authentication** to enable AI-driven automation.
- Containerized applications using **Docker** and implemented **CI/CD pipelines with Jenkins and Git** to streamline deployments.
- Collaborated with **cross-functional teams** in an **Agile/Scrum environment**, contributing to sprint planning, architecture design, and code reviews.
- Resolved production issues through **debugging, monitoring, and performance optimization**, improving system stability.
- Enhanced **SDLC practices** by improving code quality, testing workflows, and scalable architecture design.
- Designed and integrated **Generative AI** solutions by leveraging **LLM APIs**, including building Retrieval-Augmented Generation (RAG) pipelines and AI-powered chatbots to enable intelligent data retrieval and automation.

Education

2018 – 2022 **Bachelor of Technology (B.Tech), Computer Science and Engineering** CGPA: 9.5
N.B. Navale Sinhgad College Of Engineering, Solapur

Certifications

Microsoft Azure Fundamentals (AZ-900) Aug 2024

Skills

Programming Languages: Python, JavaScript, Java, SQL

Frameworks & Libraries: Django, FastAPI, React.js, LangChain

Databases: MySQL, MongoDB, PostgreSQL, BigQuery, NoSQL

Cloud & DevOps: AWS, GCP, Docker, CI/CD, Git, Bitbucket

Tools & Platforms: Kafka, Keycloak, LLM APIs, Postman, Jira, Cursor, Agile Development
